Gentlemen:

Subject: Turkey Point Units 3 and 4
Docket Nos. 50-250 and 50-251
Offsite Radio Communications Systems and Capabilities

This letter confirms the permanent installation of three radio systems designed to provide additional redundancy to the Turkey Point offsite communication system. These radio systems were described in our letter L-93-021, dated January 28, 1993.

The Very High Frequency (VHF) and Ultra High Frequency (UHF) systems are capable of short range communications within FPL, as well as with state and local government agencies.

The long range capabilities of the High Frequency Automatic Link Establishment (HF-ALE) radio system provide a communication link with the NRC in Atlanta, as well as state and local governments and FPL facilities.

This completes the storm restoration and upgrade of the Turkey Point offsite radio communication systems.

If you have any questions regarding this information, please contact us.

Very truly yours,

T. F. Plunkett
Vice President
Turkey Point Nuclear
