Re: Turkey Point Units 3 and 4
Docket Nos. 50-250 and 50-251
Generic Letter (GL) 92-01, Revision 1,
"Reactor Vessel Structural Integrity"

On May 9, 1994, the NRC issued a letter documenting their review of the information provided in response to Generic Letter (GL) 92-01, Revision 1, "Reactor Vessel Structural Integrity," for the Turkey Point Units 3 and 4 reactor vessels. The NRC letter requested Florida Power and Light Company (FPL) to verify the accuracy of the pressurized thermal shock and upper shelf energy summary file information for Turkey Point Units 3 and 4, listed in Enclosures 1 and 2 of the May 9, 1994 NRC letter.

FPL is a member of the B & W Owners Group Reactor Vessel Working Group (BWOG), and, as such, verification of the Turkey Point Units 3 and 4 information will be provided through the BWOG. The BWOG will verify the information for all utility members (FPL included) by a report that will be submitted to the NRC by June 17, 1994. FPL will provide the NRC written endorsement of the BWOG report as it applies to Turkey Point Units 3 and 4 by June 24, 1994.

Should there be any questions, please contact us.

Very truly yours,

T. F. Plunkett
Vice President
