SUBJECT: SUMMARY OF DECEMBER 11, 2017, TELEPHONE
CONFERENCE TO DISCUSS DRAFT REQUEST FOR
ADDITIONAL INFORMATION REGARDING LICENSE RENEWAL
APPLICATION INTEGRATED SAFETY ANALYSIS SUMMARY
AND MANAGEMENT MEASURES, HONEYWELL METROPOLIS
WORKS (COST ACTIVITY CODE 000224)

On December 11, 2017, the U.S. Nuclear Regulatory Commission (NRC) staff and representatives of Honeywell International (Honeywell or the licensee), held a telephone conference to discuss the staff's draft request for additional information (D-RAI) in the areas of Integrated Safety Analysis (ISA) Summary and Management Measures concerning Honeywell's license renewal application submittal dated February 8, 2017 (Agencywide Documents Access and Management System [ADAMS] Accession Number ML17048A263), as supplemented by letter dated September 20, 2017 (ADAMS ML17291A652) for its Metropolis Works (MTW) facility.

The staff's D-RAI, in the areas of ISA Summary and Management Measures, was originally sent to Honeywell, via email, on October 24, 2017. On December 11, 2017, the NRC staff made minor revisions to the D-RAI and provided it to Honeywell prior to the conference call.

The telephone conference supported the NRC staff's efforts in the first step of clarifying the intent of the staff's D-RAI. No decisions were made during the telephone conference. Based on the discussions held, both parties agreed that the majority of the questions raised in the subject D-RAI would be further clarified during the upcoming site visit, scheduled for December 13 and 14, 2017, as it would provide a forum for additional discussion and further insights for both parties.

CONTACT: Tilda Liu, NMSS/FCSE
