Re: Turkey Point Units 3 and 4
Docket Nos. 50-250 and 50-251
Response to Generic Letter 95-07,
Pressure Locking and Thermal Binding of
Safety-Related Power-Operated Gate Valves

By letter dated August 17, 1995, the NRC issued Generic Letter (GL) 95-07, "Pressure Locking and Thermal Binding of Safety-Related Power-Operated Gate Valves," requesting licensees to perform, or confirm that they performed, (1) evaluations of operational configurations of safety-related, power-operated gate valves for susceptibility to pressure locking and thermal binding and (2) further analyses, and any needed corrective actions, to ensure these valves are capable of performing their intended safety functions.

This letter provides Florida Power and Light Company's initial response to GL 95-07. It is our intent to implement the actions requested in GL 95-07 to the schedule proposed by the Staff. A written response to the information requested will be provided on or before February 13, 1996. Should our evaluations determine that corrective actions are required which cannot be completed by this date, a schedule for implementing the corrective actions along with the necessary justification for the schedule will be included in our response.

The information is provided pursuant to the requirements of Section 182a of the Atomic Energy Act of 1954, as amended, and 10 CFR 50.54(f).

Should there be any questions concerning this response, please contact us.

Very truly yours,

T. F. Plunkett
Vice President
Turkey Point Plant
