Lenexa, Kansas 66227

SUBJECT: TERMINATION OF NRC RADIOACTIVE MATERIALS LICENSE NO. 15-26978-01

By letter dated September 18, 2017, you informed the U.S. Nuclear Regulatory Commission (NRC) that you wished to terminate your NRC radioactive materials license. The NRC Form 314 dated September 18, 2017, stated that radioactive material had been transferred to Olsson Associates (Kansas Agreement State License No. 21-B1015) and the manufacturer.

The staff has reviewed the statements made in NRC Form 314 and the results of the 2016 NRC inspection. NRC license number 15-26978-01 authorizes work at temporary job sites in NRC jurisdiction and no field stations are identified in this license. Based on the documentation submitted and a review of your historical file, the staff concluded that all licensable radioactive material is no longer stored at temporary job sites in NRC jurisdiction and no field stations need to be released for unrestricted use.

Please find enclosed License No. 15-26978-01 authorizing your license termination. An environmental assessment for this action is not required since this action is categorically excluded under 10 CFR 51.22(c)(20)(ii).

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's document system (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

You can contact me at 817-200-1590 if you have questions or require clarification on any of the information stated above.

Sincerely,

/RA/

Michelle Simmons, Health Physicist
Materials Licensing and Inspection Branch
