Re: Turkey Point Units 3 and 4
Docket Nos. 50-250 and 50-251
Response to Generic Letter 96-05,
Periodic Verification of Design-Basis
Capability of Safety-Related Motor-Operated Valves

By letter dated September 18, 1996, the NRC issued Generic Letter (GL) 96-05, "Periodic Verification of Design-Basis Capability of Safety-Related Motor-Operated Valves," requesting licensees to (1) discuss the periodic verification of the capability of safety-related motor-operated valves (MOVs) to perform their safety functions consistent with the current licensing bases of nuclear power plants, (2) implement the requested actions described in the GL, and (3) provide to the NRC a written response to the GL relating to implementation of the requested actions.

GL 96-05 requested a written response within sixty days from the date of the GL indicating Florida Power and Light Co.'s (FPL) intentions to implement the requested actions and a schedule for completing implementation.

GL 96-05 also requested a written summary description of the MOV periodic verification program established in accordance with the requested actions of the GL to be submitted to the NRC within 180 days from the date of the GL, or upon notification to NRC of completion of GL 89-10 (whichever is later).

FPL will implement the requested actions by March 17, 1997. FPL will submit a summary description of the periodic verification program in accordance with the GL requested schedule. FPL has notified the NRC of its completion of GL 89-10 for Turkey Point Units 3 and 4, therefore, the requested summary description of the periodic verification program will be submitted by March 17, 1997.

The information is provided pursuant to the requirements of Section 182a of the Atomic Energy Act of 1954, as amended, and 10 CFR 50.54(f).

Should there be any questions concerning this response, please contact us.

Very truly yours,

R. J. Hovey
Vice President
Turkey Point Plant
