Subject: GEH-Morris Operation: CY2018 Integrated Inspection Plan

Dear Mr. McFadden,

In accordance with Inspection Manual Chapter 2690, "Inspection Program for Dry Cask Storage of Spent Reactor Fuel at Independent Spent Fuel Storage Installations and for 10 CFR Part 71 Transportation Packagings," the NRC Region III staff developed an Integrated Inspection Plan (IIP) for General Electric-Hitachi Morris Operation for calendar year 2018. The inspection plan is based on your current performance and your planned activities for the site in January through December 2018. Below is a list of the periodic inspection procedures we expect to use during our inspections. The procedures used during each inspection will depend on the specific activities being conducted at the site. Additional discretionary inspection procedures may be used if ISFSI activities warrant. We will gladly discuss any questions you may have regarding this IIP. If you have questions, please contact me at (630) 829-9722. If you have questions related to security inspections, please contact the Plant Support Branch Chief at 630-829-9500.

Sincerely,

Rhex Edwards

Inspection Procedure	Start Date	End Date
60858: Away-From-Reactor ISFSI Inspection Guidance	9/16/2018	10/13/2018
