AUDIT REPORT

AUDIT OF NRC'S FREEDOM OF INFORMATION ACT PROCESS

OIG-14-A-17

Status of Recommendations

Recommendation 1: Implement technology, such as RedactXpress, in the regions and larger program offices to more efficiently process FOIA requests.

Agency Response Dated
December 7, 2017:

This task has been implemented in the revised Management Directive 3.1, "Freedom of Information Act," to offer manual and electronic processing of Freedom of Information Act records. Electronic processing can be completed by the regions and program offices by using Adobe Acrobat Pro DC. Offices will also be able to provide unredacted records with a written description of the specific information that the subject matter experts recommend should be redacted. Due to agency budget constraints, the Office of the Chief Information Officer is not able to purchase RedactXpress for every user in each region and program office.

OIG Analysis:

OIG spoke with the point of contact and determined that MD 3.1 was revised to include the requirement for electronic processing and that the technology is implemented. The MD explains how the regions and larger program offices can use the technology to more efficiently process FOIA requests.

Electronic processing can be completed by the regions and program offices by using Adobe Acrobat Pro DC. Offices will also be able to provide unredacted records with a written description of the specific information that the subject matter experts recommend should be redacted. Due to agency budget constraints, the Office of the Chief Information Officer is not able to purchase RedactXpress for every user in each region and program office. This recommendation is therefore considered closed.

Status:

Closed.
