

May 28, 1984

Dear Mr. Denton,

I understand that CP&L (North Carolina) has asked the NRC ~~to~~^{that} to be exempted from a full-scale evacuation drill prior to fueling of the Shearon Harris nuclear plant. In view of the mounting evidence that the "evacuation plan" has serious flaws (Chatham County has rescinded its plan), it would be a serious mistake to honor CP&L's request.

Shearon Harris should not be allowed to open until the area's citizens feel confident that an accident at the plant could be met with an effective evacuation plan.

Thank you for your attention.

Sincerely yours,

Laine Heise
