1. The first part of the report is a general statement of the purpose and scope of the study. It is followed by a brief review of the literature on the subject.

2. The second part of the report is a description of the methods used in the study. This includes a discussion of the subjects, the experimental design, and the data collection procedures.

3. The third part of the report is a presentation of the results of the study. This includes a discussion of the findings and their implications for the field.

4. The fourth part of the report is a conclusion and a discussion of the limitations of the study. This includes a summary of the main findings and a discussion of the strengths and weaknesses of the study.

5. The fifth part of the report is a list of references. This includes a list of all the sources used in the study, including books, articles, and other documents.

6. The sixth part of the report is an appendix. This includes a list of all the data collected during the study, as well as a list of all the calculations and other statistical analyses performed.

7. The seventh part of the report is a list of figures. This includes a list of all the figures included in the report, as well as a brief description of each figure.

8. The eighth part of the report is a list of tables. This includes a list of all the tables included in the report, as well as a brief description of each table.

9. The ninth part of the report is a list of abbreviations. This includes a list of all the abbreviations used in the report, as well as a brief description of each abbreviation.

10. The tenth part of the report is a list of symbols. This includes a list of all the symbols used in the report, as well as a brief description of each symbol.

Dear Mr. Denton:

I wish to urge denial of CP&L's request for exemption from the requirement, under 10 CFR 50, Appendix E, that the Company conduct a full participation exercise of the Emergency Response Plan for its Shearon Harris nuclear power plant within one year before beginning commercial operation of the plant or before operating at greater than five percent of rated power. Because of the need for changes in the evacuation plan, I believe this exercise should be conducted before the plant is permitted to operate at all.

Sincerely,

*Mary G. Casper*
