Subject: FitzPatrick: Correction to Safety Evaluation- Proposed Alternative to utilize ASME Code Case N-789-1

Expires: Friday, March 09, 2018 12:00 AM

Hello Christian and Tom,

By letter dated December 12, 2017 (ADAMS Accession No. ML17289A075), the NRC issued a safety evaluation to Exelon Generation Company, LLC. (Exelon) for the use of an alternative to certain requirements of the American Society of Mechanical Engineers (ASME) Code Case N-789-1, "Alternative Requirements for Pad Reinforcement of Class 2 and 3 Moderate-Energy Carbon Steel Piping for Raw Water Service, Section XI, Division 1," at the James A. FitzPatrick Nuclear Power Plant.

During Exelon's review of the safety evaluation (SE), it identified a clarification in Section 2.0, "Regulatory Evaluation," and Exelon notified the NRC on January 2, 2018 (ADAMS Accession No. ML18005A925).

The NRC staff reviewed Section 2.0 of the SE, identified a minor error, and revised the SE. This revision does not change the conclusions associated with the SE. The corrected SE is available publicly (ADAMS Accession No. ML18003B382).

If you have any questions regarding this matter, please contact me. A copy of this e-mail will be placed in the public ADAMS.

Sincerely, Booma

Booma Venkataraman, P.E.
