

UNITED STATES
NUCLEAR REGULATORY COMMISSION

REGION III
2443 WARRENVILLE RD. SUITE 210
LISLE, IL 60532-4352

JAN 11 2018

Charles A. Hillis, Sr., CNMT
Radiation Safety Officer
Nuclear Diagnosis, Inc.
P.O. Box 3371
Springfield, MO 65808

Dear Mr. Hillis:

Enclosed is Amendment No. 76 to your U.S. Nuclear Regulatory Commission (NRC) Material License No. 24-17561-01 for Nuclear Diagnosis, Inc. in accordance with your request dated November 6, 2017. Your letter is available electronically from the NRC's Agencywide Documents Access and Management System (ADAMS) at Accession No. ML17324A462.

In your letter dated November 6, 2017, you requested to add Bradley K. Baker, M.D., Jeffrey B. Judd, M.D., and William Mehard, M.D. to NRC License No. 24-17561-01. During a November 28, 2017 telephone call, you clarified that all three doctors seek to be added for use of Title 10 *Code of Federal Regulations* (CFR) 35.100 and 35.200 material. Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9887 so that we may provide appropriate corrections and answers.

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you. The NRC may issue a notice of violation, imposition of a civil penalty, or an order suspending, modifying or revoking your license as specified in the General Statement of Policy and Procedure for NRC Enforcement Actions. Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which NRC expects of its licensees.

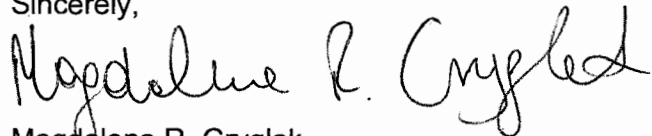

The NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's *expectations* for individuals and organizations to establish and maintain a positive safety culture. You can access the policy statement and supporting material that may benefit your organization on NRC's safety culture Web site at <http://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>. We strongly encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in NRC-regulated activities.

C. Hillis

- 2 -

In accordance with 10 CFR 2.390, a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from ADAMS, accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

Sincerely,

A handwritten signature in black ink, appearing to read "Magdalena R. Gryglak". The signature is fluid and cursive, with the first name being the most prominent.
