Subject: RE: Request for Extension: University of Missouri - Pickard Hall RAI's

License No: 24-00513-32
Docket No: 030-02278
Control No: 586692

Felicity,

In discussions with management, NRC does not have an objection to the requested 60 calendar-day extension to respond to the RAI's as outlined in ML17283A195. Therefore, please provide the requested information by March 23, 2018. If there are questions concerning specific RAI's or if additional time is needed, please contact the NRC as soon as possible.

This email shall be placed into ADAMS as a publically available record of this conversation.

Subject: [External_Sender] Request for Extension: University of Missouri - Pickard Hall RAI's
Importance: High

Hi Mike-

The University of Missouri would like to formally request an extension of 60 days from this email to respond to the RFAs outlined in ML17283A195 to allow the RSO time to catch up to speed following her medical leave, time to follow-up with the vendor on this project, and draft a response to these RFAs.

Please let me know if this email request is not sufficient and you would like a request on University of Missouri letterhead.

Sincerely,
Felicity Beckfield, CHP
Radiation Safety Officer

University of Missouri

Mr. Houts,

On October 5, 2017, the NRC visited the University to discuss future activities surrounding Pickard Hall. The trip was documented and placed into ADAMS under ML17283A195. Within that Trip report, the NRC documented 17 items that the licensee was to respond to and understood that the licensee would provide an initial response to those items within 60 days of the site visit. To date, NRC has not received an initial response to those items.

Please contact me either via email or telephonically as soon as possible to provide an update to NRC's requests for information. Thank you
