LISLE, IL 60532-4352

JAN 24 2018

William E. Witzig
Radiation Safety Officer
Alt & Witzig Engineering, Inc.
4105 West 99th Street
Carmel, IN 46032

Dear Mr. Witzig:

Enclosed is Amendment No. 4 renewing your NRC Material License No. 13-18685-02 in accordance with your request.

In your correspondence to us dated December 5, 2017, you indicated that you wished to release for unrestricted use two former addresses of use located at 3405 West 96th Street, Indianapolis, IN 46286 and 8762 Louisiana Street, Unit N, Merrillville, IN 46410. Based on the information provided, the staff has concluded that all licensable material has been removed from these facilities, and residual radioactive material attributable to licensed activities does not exceed current NRC criteria. Based on these conclusions, no further remediation or actions with respect to NRC regulated material is required for these addresses of use and these locations are suitable for unrestricted use.

Additionally, License Condition 11 has been updated to include the requirement that records for authorized gauge users be maintained for at least three years after their last use of licensed material. The following License Conditions as described on License Amendment No. 3, have been deleted: License Condition 13.C. regarding leak test requirements for sealed sources containing H-3, License Condition 15 regarding licensee removal of foil sources from a detector cell, and License Condition 20 regarding maintenance, repair, cleaning, replacement, and disposal of foils contained in detector cells. These conditions were deleted as your license no longer authorizes possession of H-3 foils for use in gas chromatography equipment.

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9887 so that we can provide appropriate corrections and answers.

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you. This could include issuance of a notice of violation, or imposition of a civil penalty, or an order suspending, modifying or revoking your license as specified in the General Statement of Policy and Procedure for NRC Enforcement Actions. Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which NRC expects of its licensees.

The enclosed document contains sensitive security-related information.
When separated from this cover letter this letter is uncontrolled.

W. Witzig

The NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's *expectations* for individuals and organizations to establish and maintain a positive safety culture. You can access the policy statement and supporting material that may benefit your organization on NRC's safety culture Web site at <http://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>. We strongly encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in NRC-regulated activities.

NRC's Regulatory Issue Summary (RIS) 2005-31 provides criteria to identify security-related sensitive information and guidance for handling and marking of such documents. This ensures that potentially sensitive information is not made publicly available through ADAMS, the NRC's electronic document system. Pursuant to NRC's RIS 2005-31 and in accordance with 10 Code of Federal Regulations 2.390, the enclosed license document is exempt from public disclosure because its disclosure to unauthorized individuals could present a security vulnerability. The RIS may be located on the NRC Web site at: <http://www.nrc.gov/reading-rm/doc-collections/gen-comm/reg-issues/2005/ri200531.pdf> and the link for frequently asked questions regarding protection of security related sensitive information may be located at: <http://www.nrc.gov/reading-rm/sensitive-info/faq.html>.

A copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the NRC's Agencywide Documents Access and Management System (ADAMS), accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

Sincerely,

Laura B. Cender
