Yes and yes, needed confirm Licensee for some reason did not want to cite the L/C amount during the most recent meeting.  
Thanks

Tom

As I previously told you the amount of the Letter of Credit is reduced as the project work is completed. As of the end of September 2017, the Letter of Credit was at \$99million.

Thank you. What is the current STANDING letter of credit amount? This came up at a recent meeting and the suggestion was it had been reduced but was adequate?

Adequate was not defined especially now that the licensee forecasts it will be leaving the site ( 8/18) MOST LIKELY as all work will have been completed and the NRC will then conduct their reviews.

Tom,

The most recent decommissioning funding status report for Zion is attached. I will check on reporting for the decommissioning of the ISFSI.

Reports and Zion Solutions indicate approximately \$ 45 MM remaining in Zion Decmm Trust Funds  
What is the amount of the previous waiver ( set aside given for future fuel management) NRC granted.  
Our understanding is that these proceeds are still in the Trust Funds but are not reported by the licensee.

Please advise and confirm. Below LTP also

Thank you

Tom Rielly

Could you advise the current status or short list remaining for NRC acceptance of the Zion Solutions License Termination Plan?

Thank you
