re: Letter dated March 26, 1996 from James Rauch concerning radon release
from the Niagara landfill in the Town of Tonawanda, New York

Mr. Sollenberger

1. DOE has now stated that they will be doing nothing about the radioactive material in the local Seaway (Niagara) landfill.
2. What now is the next excuse that the NRC is going to come up with for not stepping in and asserting regulatory control over the material at the landfill?
3. Or, is the NRC going to come in and do their job as they are supposed to do?

I expect a prompt reply to this communication.

You may fax me at: (716) 876-9552.

Thank you,

Don Finch
