General Comment

I am terribly disturbed by information that I have read regarding the San Onofre plan for spent fuel dry storage. First of all, I cannot believe that it is being left on the waters edge. Thick casks are the only acceptable way to ensure our ocean will be protected. Secondly, I am equally disturbed that authorities are even considering the thin temporary storage containers as an option. As a local resident and water enthusiast please make the thick casks the ONLY option on this process.
