General Comment

Please know that myself and everyone I've spoken to feels it is extremely important to have safer containers that it is not acceptable to have these 5/8 in containers that are only guaranteed for 10 to 25 years in cement that can crack in a tsunami Zone in an earthquake zone 108 feet from the beach this is very scary please we are looking at the health and safety and well-being of our community of the ocean and the water and ocean life of myself and all the children and Surfers that love to be in the water of the land of our Earth and leaching that can happen and we've already had so many problems with leaks please please please either take it somewhere else or if it has to stay in San onofre let's do it ever needs to happen to do fundraising to get extra money to put them in very safe very thick containers that can be monitored like they have in Europe please this is for all of our future generations and this is for right now our safety or health or well-being or water our air our land is worth it

sincerely yours

Maura Hoffman
