Mercury containing lamps are de-manufactured and processed in accordance with all local, state, and federal regulations per 40cfr273. The mercury containing phosphorous powder will be retorted and separated into non-RCRA hazardous phosphorous powder, elementary mercury, and managed commodities. Mercury containing devices/articles are de-manufactured and processed in accordance with all local, state, and federal regulations per 40cfr273. Batteries are reduced and processed in accordance with all local, state, and federal regulations per 40cfr273. Electronic scrap, non-PCB ballasts, capacitors and transformers are sent to an electronics parts specialized recycler of our choice for proper de-manufacturing, processing and recovery, and recycling. Tritium exit signs are de-manufactured and processed in accordance with all local, state, and federal regulations per 10cfr32. Smoke detectors are de-manufactured and processed in accordance with all local, state, and federal regulations per 10cfr32. Weight is the shipping weight for the recycle kit. Generators are responsible to follow instructions to properly package and identify all wastes to ensure only the correct wastes are placed in specific recycle kits.

Customer Service e-mail: csr@ezontheearth.com

1. Complete the "TRITIUM EXIT SIGN(S) WORKSHEET" beginning on the second page of this worksheet.

Tritium Exit signs are regulated by the Nuclear Regulatory Commission and require information pertaining to every sign prior to approval for processing. Please provide the manufacturer, model, manufacture date, and life expectancy or curies for each sign on this form. After we receive the completed form we will provide a "TRITIUM EXIT SIGN PRICING, PREPARATION, AND APPROVAL AGREEMENT."

2. Sign and return the "TRITIUM EXIT SIGN PRICING, PREPARATION, AND APPROVAL AGREEMENT."

Once we receive the signed "TRITIUM EXIT SIGN PRICING, PREPARATION, AND APPROVAL AGREEMENT" we will complete paperwork to obtain an RGA number required prior to any shipment of tritium exit signs. An RGA number is required for each shipment of tritium exit signs prior to shipping.

3. We will send you predetermined packaging materials for your shipment.

- A cardboard box (or boxes) sized for the number of signs you will be shipping.
- A maximum of ten signs are permitted per container for single sided signs and fives for double sided signs.
- Each box includes all proper labeling including a prepaid return shipping label addressed to the processing facility.
- Copies of the approval forms to be included in the containers.
- Copies of the container inventory list for each container.
- A plastic liner for the box as well as cardboard separators and packing materials.
- NRC notifications letters.
- DOT information for your records.

4. Package signs per instructions.

Carefully package signs per instructions. Signs must be packaged according to the inventory sheet for each container. with the an inventory sheets for the signs in Surcharges will apply if screws and brackets are left on signs, or if the sign count is not as expected. All surcharges and packaging requirements are identified in the "TRITIUM EXIT SIGN PRICING, PREPARATION, AND APPROVAL AGREEMENT."

5. Call 800-Go-FedEx and ask for ground shipping to have the packages picked up and notify the government.

All packages arrive with a prepaid FedEx Ground label attached to the container. Packages also include the proper DOT markings. After shipment notify the Nuclear Regulatory Commission (NRC) and your state government of the shipment. Example letters for notification are included in the packaging materials.
