Mr. Eldon J. Brunner, Chief
Projects Branch #1
Division of Resident and
Project Inspection
United States Nuclear Regulatory
Commission
631 Park Avenue
King of Prussia, Pennsylvania 19406

SUBJECT: Inspection Report 50-220/81-16

Dear Mr. Brunner:

The subject Inspection Report identified an occurrence at Nine Mile Point wherein a temporary change was made to a Reactor Analysis Department Procedure without proper approval per Technical Specification 6.8.3.

The change was made under the direction of the Reactor Analysis Department Supervisor, who holds a Senior Reactor Operator's license. The change was verbally concurred with by at least one member of the Reactor Analysis Department, but formal sign-off by a Senior licensed Supervisor and another member of the plant management staff was neglected until the Resident NRC Inspector pointed out the deficiency. At that time the requirements of Technical Specification 6.8.3 were complied with.

The incident and the Technical Specification have been reviewed with all members of the Reactor Analysis Department.

Very truly yours,

Thomas E. Lempges

Thomas E. Lempges
Vice President
Nuclear Generation
