1. The first part of the report deals with the general situation in the country. It is a very interesting and informative account of the conditions prevailing at the time. The author describes the political and social situation, the state of the economy, and the general mood of the population. It is a very valuable document for anyone interested in the history of the country.

2. The second part of the report deals with the specific details of the situation. It is a very detailed and thorough account of the various aspects of the situation. The author describes the political and social situation, the state of the economy, and the general mood of the population. It is a very valuable document for anyone interested in the history of the country.

3. The third part of the report deals with the specific details of the situation. It is a very detailed and thorough account of the various aspects of the situation. The author describes the political and social situation, the state of the economy, and the general mood of the population. It is a very valuable document for anyone interested in the history of the country.

4. The fourth part of the report deals with the specific details of the situation. It is a very detailed and thorough account of the various aspects of the situation. The author describes the political and social situation, the state of the economy, and the general mood of the population. It is a very valuable document for anyone interested in the history of the country.

5. The fifth part of the report deals with the specific details of the situation. It is a very detailed and thorough account of the various aspects of the situation. The author describes the political and social situation, the state of the economy, and the general mood of the population. It is a very valuable document for anyone interested in the history of the country.

6. The sixth part of the report deals with the specific details of the situation. It is a very detailed and thorough account of the various aspects of the situation. The author describes the political and social situation, the state of the economy, and the general mood of the population. It is a very valuable document for anyone interested in the history of the country.

7. The seventh part of the report deals with the specific details of the situation. It is a very detailed and thorough account of the various aspects of the situation. The author describes the political and social situation, the state of the economy, and the general mood of the population. It is a very valuable document for anyone interested in the history of the country.

8. The eighth part of the report deals with the specific details of the situation. It is a very detailed and thorough account of the various aspects of the situation. The author describes the political and social situation, the state of the economy, and the general mood of the population. It is a very valuable document for anyone interested in the history of the country.

9. The ninth part of the report deals with the specific details of the situation. It is a very detailed and thorough account of the various aspects of the situation. The author describes the political and social situation, the state of the economy, and the general mood of the population. It is a very valuable document for anyone interested in the history of the country.

10. The tenth part of the report deals with the specific details of the situation. It is a very detailed and thorough account of the various aspects of the situation. The author describes the political and social situation, the state of the economy, and the general mood of the population. It is a very valuable document for anyone interested in the history of the country.

Ms. Elinor G. Adensam, Director
BWR Project Directorate No. 3
U.S. Nuclear Regulatory Commission
7920 Norfolk Avenue
Washington, DC 20555

Dear Ms. Adensam:

Re: Nine Mile Point Unit 2
Docket No. 50-410

During discussions regarding Regulatory Guide 1.97, your staff requested that we identify our plans for installing a Neutron Monitoring System at Nine Mile Point Unit 2. This would be qualified to withstand a post-accident environment.

In principle, Niagara Mohawk believes such a system would be beneficial and is predisposed to install an environmentally qualified system should a thorough evaluation demonstrate the system's qualification, performance and safety. At the present time, however, we are not aware of any system available that has been demonstrated to meet that criteria, and, therefore, we have no current plans to install such a system at Unit 2.

Niagara Mohawk will continue to monitor industry efforts to develop a qualified Neutron Monitoring System for long-term post-accident monitoring. When qualified equipment becomes available, Niagara Mohawk will install it at Unit 2 by the first refueling following availability, unless we justify to the Nuclear Regulatory Commission that installation of the specific equipment would result in an overall decrease in the safety of the plant. In this case, Niagara Mohawk will continue its efforts to identify and procure acceptable qualified equipment.

Very truly yours,

C. V. Mangan
