1. LICENSEE/LOCATION INSPECTED:

American Renolit Corporation
1207 East Lincolnway
La Porte, IN 46350-3987

2. NRC/REGIONAL OFFICE

Region III
U. S. Nuclear Regulatory Commission
2443 Warrenville Road, Suite 210
Lisle, IL 60532-4352

REPORT NUMBER(S) 2018001

3. DOCKET NUMBER(S)

030-18733

4. LICENSE NUMBER(S)

13-24638-01

5. DATE(S) OF INSPECTION

January 29, 2018

LICENSEE:

The inspection was an examination of the activities conducted under your license as they relate to radiation safety and to compliance with the Nuclear Regulatory Commission (NRC) rules and regulations and the conditions of your license. The inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observations by the inspector. The inspection findings are as follows:

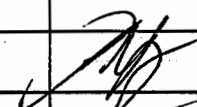

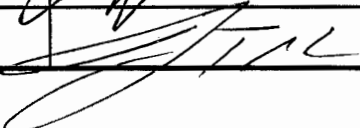

- ☒ 1. Based on the inspection findings, no violations were identified.
- ☐ 2. Previous violation(s) closed.
- ☐ 3. The violation(s), specifically described to you by the inspector as non-cited violations, are not being cited because they were self-identified, non-repetitive, and corrective action was or is being taken, and the remaining criteria in the NRC Enforcement Policy, to exercise discretion, were satisfied.

Non-cited violation(s) were discussed involving the following requirement(s):

- ☐ 4. During this inspection, certain of your activities, as described below and/or attached, were in violation of NRC requirements and are being cited in accordance with NRC Enforcement Policy. This form is a NOTICE OF VIOLATION, which may be subject to posting in accordance with 10 CFR 19.11.
(Violations and Corrective Actions)

Statement of Corrective Actions

I hereby state that, within 30 days, the actions described by me to the Inspector will be taken to correct the violations identified. This statement of corrective actions is made in accordance with the requirements of 10 CFR 2.201 (corrective steps already taken, corrective steps which will be taken, date when full compliance will be achieved). I understand that no further written response to NRC will be required, unless specifically requested.

☐ Temporary Job Site Inspection

PROGRAM SCOPE

This was an unannounced, routine inspection of a manufacturer of plastic films and derived products in La Porte, Indiana. The licensee employed 170 individual and possessed four specifically licensed Beta Control Model MK 1.0 fixed gauges used to determine the thickness of plastic coatings. At the time of the inspection one individual was involved with use and oversight of the devices and was also the RSO. Inventories and shutter checks are performed at required at six-month frequencies. The licensee does not perform any installation, maintenance, repair or removal activities relating to the gauge. Instead, the manufacturer is called in for these services. The licensee was not required to leak test their gauges.

Performance Observations

The inspector toured the plant facility and observed the gauges in conjunction with the licensee's current inventory. The inspector evaluated the licensee's measures for materials security, hazard communication, and exposure control. The licensee adequately described proper lock-out procedures. Interviews with licensee staff indicated adequate knowledge of radiation safety procedures and concepts. The inspector performed independent and confirmatory measurements that indicated similar results as the licensee's records. The inspector reviewed inventory and shutter checks records.

No violations of NRC requirements were identified during this inspection.
