RE: Nine Mile Point Unit 1
Docket No. 50-220
DPR-63

Gentlemen:

Niagara Mohawk Power Corporation hereby transmits an Application for Amendment to Nine Mile Point Unit 1 Operating License DPR-63. Also enclosed are proposed changes to the Technical Specifications set forth in Appendix A to the above mentioned License. Supporting information and analysis demonstrating that the proposed changes involve no significant hazards consideration pursuant to 10CFR50.92 are included as Attachment B.

The proposed Technical Specification change contained herein represents revision to Specification 3.4.1, "Leakage Rate" and the Associated Bases. Specifically, the revision reflects the change in the Reactor Building leakage rate from 2000 cfm to 1600 cfm. This change is being proposed to reflect the design basis of the Reactor Building and Reactor Building Emergency Ventilation System (RBEVS). This change does not result in any change to the radiological consequences of either the design basis loss of coolant accident or refueling accident.

Pursuant to 10CFR50.91(b)(1), Niagara Mohawk has provided a copy of this license amendment and the associated analysis regarding no significant hazards consideration to the appropriate state representative.

Very truly yours,

B. Ralph Sylvia
Exec. Vice President - Nuclear
