VIRGINIA ELECTRIC AND POWER COMPANY
SURRY POWER STATION UNITS 1 AND 2
REVISED LICENSE RENEWAL COMMITMENT
PRESSURIZER SURGE LINE WELD INSPECTION FREQUENCY
REFERENCE CORRECTION IN SUPPORTING TECHNICAL REPORT

By letter dated November 20, 2017 (Serial No. 17-317), Virginia Electric and Power Company (Dominion Energy Virginia) submitted a request to revise the Surry Units 1 and 2 pressurizer surge line weld inspection frequency license renewal commitment from once every 40 months to once every 10 years for the fifth and sixth inservice inspection (ISI) intervals. Attachments 1 and 2 of the subject letter included proprietary and redacted versions, respectively, of the supporting technical report prepared by Structural Integrity Associates, Inc. (SIA) for the proposed inspection frequency change. Subsequent to the submittal of the letter, SIA identified a reference included in Section 8.0, References, of the report that contained an incorrect report number. Specifically, the report number provided for Reference 23 was "SI V&V Report No.1600402.301," but should have been "SI V&V Report No.1601007.301." Please note this correction during your review of Dominion Energy Virginia's commitment change request.

If you have any questions or require additional information, please contact Mr. Gary D. Miller at (804) 273-2771.

Respectfully,

Mark D. Sartain
Vice President – Nuclear Engineering and Fleet Support
