Docket Nos. 50-387
50-388

Dear Mr. Schwencer:

In a recent meeting (March 8, 1984) with NRC representatives at the Susquehanna SES site, new information on BWR core thermal hydraulic stability was discussed.

Based on a lack of time in which to review this issue in detail, PP&L requests that further action on this issue be deferred at this time. PP&L will commit to providing either a proposed change to the Susquehanna SES Units 1 and 2 Technical Specifications prior to exceeding five percent power on Unit 2, or an alternative resolution that is acceptable to the NRC staff.

Very truly yours,

N. W. Curtis

Vice President-Engineering & Construction-Nuclear
