U.S. Nuclear Regulatory Commission, Region IV
1600 East Lamar Boulevard
Arlington, Texas 76011
Attn: Director, Division of Nuclear Material Safety

Subject: Rescission of Written Notice to Invoke Gilbane Federal's License for Excavation and Remediation Work at the RW028 Burial Site at Ellsworth Air Force Base, South Dakota

Dear Director:

Pursuant to Condition 15 of NRC Radioactive Materials License No. 04-29353-01, Gilbane Federal provided written notice to the NRC by letter dated November 21, 2017, of our planned mobilization as early as December 5, 2017, to perform excavation and remediation work at the above referenced site. This letter is to rescind that notice.

Gilbane Federal has not mobilized to or performed any license activities at the referenced site. At present, the work scope for this project is being revisited and there is no longer a definitive date for its performance. Since no mobilization occurred, no license activities were performed, and the radiological work remains to be completed, we believe a notice of termination pursuant to Condition 19 of Gilbane's license is not appropriate.

If you have any questions, please do not hesitate to contact me at (360) 751-4172, or email me at jcooper@gilbaneco.com.

Sincerely,

Jerry C. Cooper
Corporate Radiation Safety Officer
Gilbane Federal
