PALISADES PLANT - REPORT OF EDDY CURRENT TESTING, DATA EVALUATIONS, AND
TUBE PLUGGING

The attached report entitled "Final Report 1983-1984 Palisades Steam Generator Eddy Current In-Service Inspection," summarizes the Eddy Current Testing (ET) program and results obtained for the Palisades Steam Generator (S/G) Inspection which occurred during the period of August 30, 1983 to April 30, 1984.

The information in this report is submitted in accordance with the Palisades Plant Technical Specifications Section 4.14.6 and demonstrates compliance with the requirements of Technical Specification 4.14.

The NIS-1 Owner's Data Report for Inservice Inspection will be submitted as an addenda to this report after the review of the Final Report and Record by the authorized inspector. This form is not addressed in the Technical Specifications but is required by Section XI of the ASME Code to be submitted within 90 days of completion of the inservice inspection.
