Hi Laci (or Anna),

The request concerns the attached shape files of one transmission line segment of about 6.6 miles located in Georgia that could be modified as part of the above project. Could GA NHP please identify species and habitats (terrestrial and aquatic) of concern to both the State and Federal governments within 0.125 (1/8th) miles on either side of the transmission line segment.

If you could report findings in a sortable spreadsheet, that would be much appreciated. Note that we do not need coordinates for species/habitat locations rather just a list of the species/habitats with occurrences within the specified buffer.

Thank you very much for helping us with this. If you have any questions, please call me at 509-371-7186.

Thank you,

Jim Becker
