Dear Mr. Leutzinger:

Enclosed is Amendment No. 9 to your NRC Material License No. 24-00513-37 in accordance with your request dated February 05, 2018.

The NRC staff has reviewed your submittal. Based on its review, the staff has concluded that all radioactive material has been removed from Biological Sciences Building and the residual contamination does not exceed current NRC criteria for unrestricted use.

An environmental assessment for this action is not required, since this action is categorically excluded under 10 CFR 51.22(c) (20) (iii).

NRC's Regulatory Issue Summary (RIS) 2005-31 provides criteria to identify security-related sensitive information and guidance for handling and marking of such documents. This ensures that potentially sensitive information is not made publicly available through ADAMS, the NRC's electronic document system.

Pursuant to NRC's RIS 2005-31 and in accordance with 10 Code of Federal Regulations 2.390, the enclosed license document is exempt from public disclosure because its disclosure to unauthorized individuals could present a security vulnerability.
