

IMPORT LICENSENRC FORM 250
(10-07)**UNITED STATES OF AMERICA****Nuclear Regulatory Commission
Washington, D.C. 20555****NRC LICENSE NO.:** IW009/03**NRC DOCKET NO.:** 11005149**LICENSE EXPIRES:** December 31, 2023

Pursuant to the Atomic Energy Act of 1954, as amended, and Title 10, Code of Federal Regulations, Chapter 1, Part 110, a license is hereby issued to the licensee designated below authorizing the import of nuclear materials and/or facilities into the United States of America in accordance with the statements and representations made by the licensee in the application referenced below. This license is subject to all applicable rules, regulations, and orders of the United States Nuclear Regulatory Commission now or hereafter in effect and to any conditions specified below.

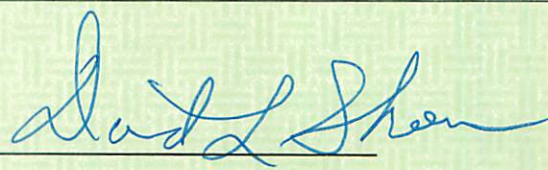

Reference Documents: Application dated August 9, 2017**U.S. Licensee/Receiving Facility:** Framatome Inc.
2101 Horn Rapids Road
Richland, WA 99354**Contact:** Michael Wilbricht

Quantity and Type: A maximum total quantity of 36 kilograms of uranium-235 contained in 1,200 kilograms uranium enriched to 5 WGT % maximum is authorized for import as Class A radioactive waste contaminants on combustible materials (paper, wood, clothing and plastic) for incineration and recovery of the contained uranium. The combustible materials were contaminated in the process of fabricating low enriched uranium fuel (conversion of uranium hexafluoride, production of uranium dioxide powder; pressing uranium dioxide powder into pellets; and loading pellets into fuel assemblies).

Points of Origin: Advanced Nuclear Fuels GmbH, Am Seitenkanal 1, 49811 Lingen, Germany

End Use: Imported combustible materials will be processed to recover the uranium. Any contaminated non-combustibles recovered will be returned to the Advanced Nuclear Fuels GmbH facility in Germany, pursuant to a valid NRC export license (e.g., XW015, and subsequent amendments). Low-level radioactive waste generated during the recovery process will be disposed of at the U.S. Ecology, Inc. facility in Richland, Washington. Any radioactive mixed waste generated during the recovery process will be disposed of at the Energy Solutions facility in Clive, Utah.

Amended to: 1) change the licensee name from AREVA NP Inc. to Framatome Inc.; 2) change the licensee point of contact; 3) update the address of the Point of Origin; and 4) extend the date of expiration from December 31, 2020, to December 31, 2023.

Authorized for the U.S. Nuclear Regulatory Commission by:Name: David L. Skeen, Deputy Director
Office of International ProgramsSignature: **Date of Issuance:****February 26, 2018**

License Condition: This NRC license authorizes import of the listed materials only. The U.S. licensee and U.S. Receiving Facility are responsible for complying with any and all additional Federal and State government requirements that apply, including all terms and conditions of its domestic materials licenses.
