**SUBJECT: GE HEALTHCARE REGISTRATION CERTIFICATES NO. NR-1032-D-103-S  
AND NR-1032-D-104-S**

Dear Mr. London:

This letter is in response to the State of Texas request dated October 5, 2017, requesting to transfer GE Healthcare Texas Sealed Source and Device Registrations Nos. TX-1032-D-103-S and TX-1032-S-104-S to U.S. Nuclear Regulatory Commission (NRC). We have issued new registration certificates NR-1032-D-103-S and NR-1032-D-104-S to replace TX-1032-D-103-S and TX-1032-S-104-B. Copies of the new registration certificates are enclosed.

You must manufacture and distribute the product in accordance with the statements and representations contained in your application, with enclosures thereto, and the information set out in your registration certificates. As a general rule, you must request and obtain an amendment to the certificates before you make changes or modifications to the information submitted to obtain the certificates.

Note that a certificate of registration, by itself, does not convey authorization for possession or distribution of radioactive sources or devices. An NRC or Agreement State license is required for possession and distribution of radioactive materials, sources, or devices.

Please read over the registration certificates in its entirety and notify us immediately of any errors or omissions.

GE Medical Systems (Healthcare) registration certificates will be subject to the NRC annual fee category 9A, which may be found under 10 CFR 171.16, "Annual fees: Materials licensees, holders of certificates of compliance, holders of sealed source and device registrations, holders of quality assurance program approvals, and government agencies licensed by the NRC."

You are obligated to notify us promptly in writing should you decide to no longer manufacture, distribute, or offer service support for the product.

W. London
