Subject: Acknowledgement of receipt of ACL application for Mine Unit 1 at Smith Ranch

Larry –

We've received your alternate concentration limit (ACL) application for Mine Unit 1 at Smith Ranch. The document is in the process of being added to ADAMS.

The staff is not initiating its acceptance review at this time. As you are aware, the NRC staff's priority is completion of the Smith Ranch license renewal review. For this ACL application, the NRC staff's intent is to initiate the review once the safety evaluation report and environmental assessment for the license renewal are further along in the process. Our goal with the ACL application would be to engage in communication surrounding an acceptable application. This could potentially include discussions with the State of Wyoming.

The NRC staff will contact you when the acceptance review begins.
