

UNITED STATES  
NUCLEAR REGULATORY COMMISSION  
WASHINGTON, D.C. 20555-0001

March 23, 2018

MEMORANDUM TO: Jennifer Dixon-Herrity, Chief  
Licensing Branch 4  
Division of New Reactor Licensing  
Office of New Reactors

FROM: Jordan Hoellman, Project Manager /RA/  
Licensing Branch 4  
Division of New Reactor Licensing  
Office of New Reactors

SUBJECT: SUMMARY OF A PUBLIC MEETING WITH SOUTHERN NUCLEAR  
OPERATING COMPANY ON MARCH 8, 2018

The U.S. Nuclear Regulatory Commission (NRC) staff held a Category 1 public meeting with Southern Nuclear Operating Company (SNC) on March 8, 2018. The purpose of the meeting was to discuss technical information regarding crediting China First of a Kind (FOAK) testing for SNC's Vogtle Electric Generating Plant (VEGP) Units 3 and 4.

The meeting notice can be found in the Agencywide Documents Access and Management System (ADAMS) under Accession Number ML18054A277. The meeting notice is also posted on the NRC public website. Enclosures 1 and 2 are the meeting agenda and attendance list for the meeting, respectively. The other documents referenced during the discussion can be found at the ADAMS Accession Numbers given below:

- Public Presentation for Crediting FOAK  
Testing from China AP1000 Units – ML18060A261
- VEGP Units 3 and 4, Transmittal of Proprietary  
Presentation Slides for NRC Public Meeting  
Scheduled for March 8, 2018 Regarding License  
Amendment Request for Crediting China FOAK  
Testing (ADAMS Package) – ML18060A442

CONTACT: Jordan Hoellman, NRO/DNRL

Summary of Meeting:

On March 8, 2018, staff from the NRC conducted a public meeting with representatives from SNC to discuss technical information regarding crediting China FOAK testing for SNC's VEGP Units 3 and 4.

SNC walked through the presentation, noting that they intend to submit LARs to credit First Plant Only Tests (FPOTs) and First Three Plant Only Tests (F3POTs) completed on the China AP1000 units (Sanmen Units 1&2 and Haiyang Unit 1) for VEGP Units 3 and 4. SNC discussed that they completed an assessment of the implementation of the Quality Assurance (QA) program used in China, which included a review of completed tests and test procedures for QA adherence, and the assessment resulted in no impacts to the test results. SNC also noted that an industry subject matter expert performed a comparison of Chinese Regulations to Title 10 of the *Code of Federal Regulations* (10 CFR) Part 50, Appendix B and concluded that the requirements are comparable.

SNC discussed the applicability of the FPOTs and F3POTs in China to VEGP Units 3 and 4. SNC emphasized that the major passive core cooling system (PXS) components, reactor coolant system (RCS) components (including the reactor vessel and reactor vessel internals), and the RCS pressure boundary piping in China and at VEGP Units 3 and 4 are (1) manufactured to the same design specification, (2) procured to the same quality requirements imposed by the design specification, and (3) built to the same design tolerances. SNC noted that because of the standardization of the AP1000 design, the FPOTs and F3POTs performed in China can be used to further establish the unique phenomenological performance parameters of the AP1000 design features that will not change from plant to plant.

The staff stated that they understood SNC's proposed approach to submit LARs to revise the FPOTs and F3POTs in the VEGP Units 3 and 4 combined licenses. The staff noted that the LARs would need to demonstrate the adequacy of the QA program used in China and the acceptability and applicability of the China FPOTs and F3POTs results to VEGP Units 3 and 4 and that the staff's detailed review of the LARs would be performed once the LARs are formally submitted.

At the end of the open portion of the meeting, there was an opportunity for the public to provide comments and ask questions. All comments or questions from members of the public were addressed by the staff before the public portion of the meeting ended.

In the closed portion of the meeting, the proprietary details of the QA program used in China, the China FPOTs and F3POTs results, and the applicability of the results to VEGP Units 3 and 4 were discussed.

Docket Nos.: 052-025  
052-026

Enclosure:  
As stated
