NRC Docket No. 70-3103

Subject: UUSA Use of a Medical Wireless Transmitting Device in Classified Area

References: 1) LES-18-031-NRC, UUSA Use of a Medical Wireless Transmitting Device in Classified Area, February 26, 2018
2) Guidance on Use of Wireless Devices in Areas Having U.S. Department of Energy Accredited Classified Networks (dated December 2, 2013); Incoming Correspondence IN-13-00107-NRC

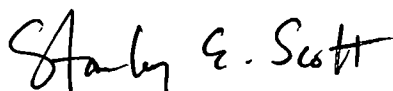

Louisiana Energy Services (LES), dba URENCO USA (UUSA) submitted the Reference 1 correspondence requesting the general use of a medical device for a specific individual. As a result of discussions with the NRC and DOE, UUSA is replacing the previous submittal with more specific information on the devices needing approval.

UUSA herewith and in accordance with Reference 2, requests NRC review and concurrence with UUSA's use of a wireless device as specified in Enclosure 1. Enclosure 1 provides the background and basis for use of the wireless devices.

Enclosure 1 contains Personal Identifiable Information and disclosure to the public would constitute a clearly unwarranted invasion of personal privacy. UUSA requests that the enclosure be withheld from public disclosure in accordance with 10 CFR 2.390(a)(6). Enclosure 2 affidavit supports this withholding request.

UUSA appreciates the efforts of the NRC staff in supporting the review and concurrence of this policy. Should there be any questions, please contact, Wyatt Padgett, Licensing and Performance Assessment Manager at 575.394.5257.

Respectfully,

Stan Scott for
