The Honorable Kristine Svinicki
The United States Nuclear Regulatory Commission
One White Flint North
11555 Rockville Pike
Rockville, MD 20852-2738

Dear Chairman Svinicki,

Thank you so much for your participation in the Advanced Nuclear Summit last week. We greatly appreciated hearing your perspective on the event panel discussions and the state of the industry at large. It was the perfect punctuation mark on the morning.

We at Third Way, and many others in the audience representing a diverse set of communities, appreciate and support your efforts as Chairman to develop the NRC's ability to perform regulatory reviews of advanced reactors. As you mentioned in your remarks, for many advanced nuclear companies, phased or staged licensing is not only a preference, but in many cases, a business imperative. That is why we consider the NRC's goal to modernize its evaluation process so important.

But as you also mentioned, nuclear power does not exist on an island. As we continue to engage different communities in the clean energy innovation space, we hope to be a resource for broadened cooperation and a driver of positive change. Please do not hesitate to contact us if we can be helpful to your organization and its mission.

Thank you again for your time, and we look forward to speaking again soon.

Best,

Josh Freed
Vice President for the Clean Energy Program
Third Way
