Subject: [External_Sender] Amendment Request for JW North America Exempt License 20-23981-01E (Address Change)
Attachments: AMENDMENT - USNRC FOR ADDRESS - FULL COPY 1.pdf

Hello Shirley,

I want to alert you to a new amendment application that we will be submitting to your department (via US mail) in the next days. Earlier this year, USNRC granted us an amended "E" license to allow us to distribute electron tubes from our new warehouse location in GA. Since the issuance of that amended license, we have moved our corporate headquarters to a new location as indicated in the attached documentation. We therefore, want to have our current Materials license to reflect the new headquarters location.

As mentioned in my cover letter, there are no other changes that we want to make, just a simple change to our company office address. (Note - no rad materials are stored at, or distributed from, our offices in MA.)

I would have included the new address in our first amendment, but at the time of the submission, the move to our new offices was not fully planned and the final address was not known.

The hard copy of our amendment application will be sent this week and you should see it the following week. I will check back with you at end of next week to see if it arrived ok.

If you should need any additional information in the meantime, please don't hesitate to contract me.

Many thanks,

Steven

Steven,

Your license amendment is approved, and it will be mailed out next Tuesday, since Monday is a federal holiday.

Regards,

Shirley Xu

Hello Ms. Xu,

I just want to check in with you quickly to see if the review of our Request for Amendment to our E-License is progressing smoothly.

If there is anything you need from us, please let me know.

Thank you and best wishes for the new year.

Steven

Hello,

In conjunction with our license amendment request (Mail Control No. 601798), I would like to inform you that we just received our Radioactive Materials "possession" License from the state of Georgia. This is for the location where we would like to relocate our current stock of exempt quantity Kr85 electron tubes and ultimately, pending acceptance of our NRC amendment request) from where we would like to distribute product.

As we would like to make the move before our current lease is up in January, we are hoping that we can have an amended license in hand in the next few weeks. If there are any open questions regarding the review of our application, I stand ready to provide a prompt response.

Thanks and best wishes for the holidays,

Steven

Good morning Mr. Schlitt! We just received your application for an amendment to your Exempt License 20-23981-01E. You will receive a form from us next week noting the receipt of your application and the reviewer's name. Until then, if you have any questions please give me a call.

Thanks, Debbie
