REGULATORY DOCKET FILE COPY

Director of Nuclear Reactor Regulation
Attn: Mr. Daniel R. Muller, Deputy Director
Division of Site Safety and
Environmental Analysis
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Dear Mr. Muller:

Re: St. Lucie Plant Unit No. 1
Docket No. 50-335
Operating License DPR-67
Appendix I Evaluation

In accordance with 10 CFR 50.30, Florida Power & Light Company submits herewith forty (40) copies and three (3) signed originals of its evaluation of St. Lucie Unit No. 1's compliance with the Staff's design objectives for controlling reactor effluents from light-water-cooled nuclear power reactors. The guidelines of Regulatory Guides 1.109, 1.110, 1.111, and 1.112 have been used as the basis for this document. Our calculations and our conclusion that St. Lucie Unit No. 1 is, indeed, in compliance with Appendix I to 10 CFR 50, are supported by the inputs generated from these guidelines.

Our Technical Specifications to implement Section V.B.2 of Appendix I have been prepared and are being submitted to the Commission as a separate packet.

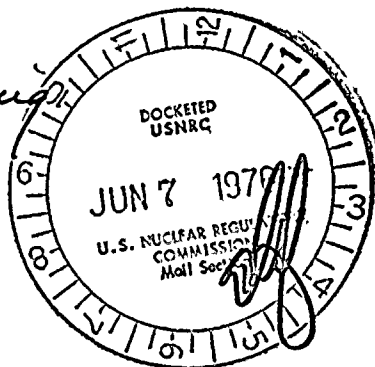

Very truly yours,

Robert E. Uhrig
Robert E. Uhrig
Vice President
