April 3, 1979

Dear Mr. Tribble

I am doing a government term paper on the "Facts of the Surry Nuclear plant" In this paper I will try to tell the reader who, why, and what could happen with the plant being on a fault. Secondly I Plan to find out why and whom closed the plant when energy conservation is suppose to be the major concern of every person in the U.S. not excluding senators who may be looking for votes, or what ever else they are trying to get.

With that I need information on the power plant and facts about the fault, and information on the senate committee's report which led to the closing of the plant. If you can think of any other information that would be of help it would be appricated.

THANK YOU

Bill Whitley
