## NRC DISTRIBUTION FOR PART 50 DOCKET MATERIAL

FILE NUMBER

TO: Mr. Dennis L. Ziemann		FROM: Florida Power & Light Company Miami, Florida Robert E. Uhrig		DATE OF DOCUMENT 4/8/77
<input checked="" type="checkbox"/> LETTER <input checked="" type="checkbox"/> ORIGINAL <input type="checkbox"/> COPY		<input type="checkbox"/> NOTORIZED <input checked="" type="checkbox"/> UNCLASSIFIED		DATE RECEIVED 4/11/77
PROP		INPUT FORM		NUMBER OF COPIES RECEIVED 15610

## DESCRIPTION

Ltr. trans the following:

(1-P)

## PLANT NAME:

St. Lucie Unit No. 1

RJL

## ENCLOSURE

Consists of information concerning the  
Unit No. 1 steam generator operating  
history.....

(2-P)

ACKNOWLEDGED  
DO NOT REMOVE

Re: St. Lucie Unit No. 1  
Docket No. 50-335  
Steam Generator Operating History

In response to a request from Mr. R. D. Silver of your office, attached is information concerning the St. Lucie Unit No. 1 steam generator operating history.

Yours very truly,

  
Robert E. Uhrig  
Vice President

1-1-1

a. Significant operating history

1. O. L. date - 3/1/76
2. Full power operation - 2/19/77
3. Major period(s) of downtime (non-refueling) - 7/10/76 to 12/10/76  
Outage to replace burnable poison pins in fuel assemblies

b. Materials of construction for major secondary system components

1. S. G. tubes - Inconel 600
2. S. G. tube sheet - Carbon steel (Inconel clad on primary side)
3. S. G. tube support plates - Carbon steel
4. Condenser tubes - Alum-Brass (90-10 Cu-Ni used in air removal section)
5. Other - Feedwater heater tubes: Admiralty (6 heaters);  
90-10 Cu-Ni (2 heaters); Monel (2 heaters). All have steel shell.

c. Operational history of secondary water treatment

1. Period of use of phosphates - None
2. Period of use of AVT - All
3. Period of use of condensate demineralization - None
4. Other - Hydrazine for oxygen control and ammonia for pH control

d. Condenser cooling water - typical chemical composition

Cooling water is straight seawater (Atlantic Ocean).  
19,800 ppm chlorides and 6.65 ppm Dissolved Oxygen  
See attached chemical analysis

e. History of significant condenser tube leakage

1. Date discovered - About 4 events between 12/76 and 3/77
2. How discovered - Condenser and steam generator conductivity
3. Leakage associated - Approximately 10 condenser tubes have been plugged.

f. Denting history

1. Date discovered - None
2. How discovered - None
3. Leakage associated (gpm) - None

g. Steam Generator Tube plugging history

1. Dates - None
2. Number of tubes - None

h. Operating restrictions imposed on the plant due to degraded S.G. conditions.

None
