Regulatory Docket File

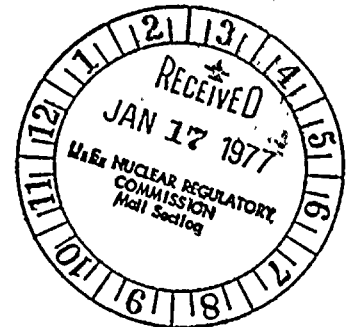

January 13, 1977
L-77-16

Mr. Benard C. Rusche, Director
Office of Nuclear Reactor Regulation
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Dear Mr. Rusche:

Re: St. Lucie Unit 1
Docket No. 50-335
Annual Operating Report

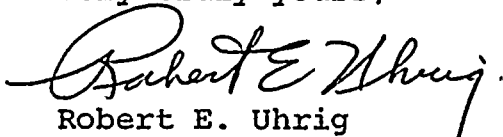

We have reviewed your letter of December 1, 1976 and the enclosed model annual report.

We have determined that the model is not appropriate for our 1976 annual operating report. Since the report is almost completed for 1976, to reformat and research the additional information would delay its submittal beyond the date required by Technical Specifications.

We agree in principal that the consistent arrangement of annual operating reports would be desirable. However, the proposed model exceeds the requirements of the plant Technical Specifications and Regulatory Guide 1.16, and requires repetition of information submitted in special reports required by Technical Specifications.

Very truly yours,

Robert E. Uhrig
Vice President
