Attn: Mr. A. Schwencer, Chief
Operating Reactors Branch No. 1
Division of Operating Reactors
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Serial No. 006
LQA/ESG:dbb
Docket No. 50-280
License No. DPR-32

Dear Mr. Denton:

SURRY POWER STATION UNIT 1
AMENDMENT TO OPERATING LICENSE
STEAM GENERATOR INSPECTION PROGRAM

By our letter of April 6, 1979, (Serial No. 159) we requested an operating license amendment to allow seven months of equivalent full power operation prior to the next steam generator inspection. Results of the latest steam generator inspection were forwarded with our letter of May 31, 1979 (Serial No. 373).

Based on recent discussions with Mr. D. Neighbors of the staff, we understand that the staff wishes to specify that the next inspection be conducted following six months of equivalent full power operation. We have considered this position, and have no objection to its being reflected in the license amendment.

Very truly yours

C. M. Stallings

C. M. Stallings
Vice President - Power Supply
and Production Operations

cc Mr. James P. O'Reilly, Director
Office of Inspection and Enforcement
