License Nos. DPR-32, DPR-37  
NPF-4, NPF-7

Gentlemen:

VIRGINIA ELECTRIC AND POWER COMPANY  
REVISION 1 TO NUREG-0737 RESPONSE

Enclosed is Revision 1 to our December 15, 1980 (Serial No. 985) submittal titled "Response to NUREG-0737 Post-TMI Requirements". Vepco committed to periodically update our NUREG-0737 response in the December 15, 1980 submittal. The enclosed revision provides the information necessary to update our NUREG-0737 such that it reflects the current status of our implementation efforts as of May 31, 1981.

A significant aspect of this revision is that it includes the finalized requirements of NUREG-0696 (Item III.A.1.2). Also, no significant schedular exceptions are introduced by this revision. The revision does, however, provide typographical error corrections to some submittal and implementation dates as well as revisions to dates which were inconsistent with other Vepco commitments. These other commitments are due or have been made in response to requirements of other NUREG's or I&E Bulletins.

Item II.E.1.2 Part 2 has been discussed with the NRC Project Manager and Technical Reviewer in regard to Surry AFW flow transmitter qualifications. The revision contained herein reflects that conversation.

We hope that this update will assist your staff in the review of our implementation efforts. If there are any questions or concerns, please contact this office at your convenience.

Very truly yours,

A handwritten signature in dark ink, appearing to be "B. R. Sylvia".

B. R. Sylvia  
Manager - Nuclear  
Operations and Maintenance
