Docket Nos. 50-280
50-281
License Nos. DPR-32
DPR-37

Gentlemen:

AMENDMENT TO OPERATING LICENSES DPR-32 AND DPR-37
SURRY POWER STATION UNITS NO. 1 AND NO. 2
SUPPLEMENT TO PROPOSED TECHNICAL SPECIFICATION CHANGE

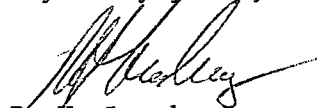

In a letter dated November 14, 1980 (Serial No. 915), we requested a change to the Technical Specifications for Surry Power Station, Units No. 1 and No. 2. Enclosed are proposed Technical Specification changes to supplement our November 14, 1980 license amendment application.

These supplemental changes address comments received from members of the Staff during their review of the November 14, 1980 submittal. Specifically, the changes incorporate additional actions required for failing to fulfill certain Limiting Conditions of Operation, modify auxiliary feedwater flow rate instrumentation surveillance requirements, incorporate a listing of containment isolation valves in Section 3.8 as requested by the July 2, 1980 Staff letter, and reformat previous information provided in the original license amendment application.

This request has been reviewed and approved by the Surry Station Nuclear Safety and Operating Committee and by the Safety Evaluation and Control staff. It has been determined that this request does not pose an unreviewed safety question.

We have reviewed this request in accordance with the criteria in 10 CFR 170.22. Since this request supplements our November 14, 1980 submittal, no additional license amendment fee is required.

Very truly yours,

R. H. Leasburg
