Gentlemen:

AMENDMENT TO OPERATING LICENSES DPR-32 AND DPR-37  
SURRY POWER STATION UNITS NO. 1 AND NO. 2  
SUPPLEMENT TO PROPOSED TECHNICAL SPECIFICATION CHANGE

By a letter dated September 21, 1981 (Serial No. 551), we proposed changes to the Technical Specifications for Surry Power Station, Unit Nos 1 and 2 to reflect revisions to sections 3.21 and 4.18. The proposed changes enclosed in Attachment 2 supplement our September 21, 1981 license amendment application.

The Fire Protection Safety Evaluation Report for Surry Power Station dated September 19, 1979 required the upgrading and installation of new fire protection systems. The enclosed Technical Specification Sections 3.21 and 4.18 have been modified to reflect the added fire protection systems and are consistent with the Standard Technical Specifications. The fire protection modifications associated with these proposed Technical Specification changes will increase the fire protection capability of the station.

This request has been reviewed and approved by the Station Nuclear Safety and Operating Committee and by the Safety Evaluation and Control staff. It has been determined that this request does not involve an unreviewed safety question.

In the September 19, 1979 letter transmitting the Fire Protection Safety Evaluation Report for Surry Power Station, it was requested that we propose revised Technical Specifications for modifications required by the Safety Evaluation Report. The request noted your determination that no license amendment fee is required for the requested Technical Specification revisions. Accordingly, no license amendment fee accompanies this request.

Very truly yours,

  
R. H. Leasburg
