March 3, 1983

Mr. Harold R. Denton, Director  
Office of Nuclear Reactor Regulation  
Attn: Mr. Darrell G. Eisenhut, Director  
Division of Licensing  
U. S. Nuclear Regulatory Commission  
Washington, D. C. 20555

Serial No. 103  
NO/WDC:acm  
Docket Nos. 50-280  
50-281  
License Nos. DPR-32  
DPR-37

Gentlemen:

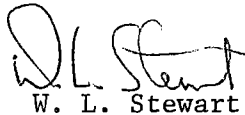

VIRGINIA ELECTRIC AND POWER COMPANY  
SURRY POWER STATION UNIT NOS. 1 AND 2  
NUREG-0737 ITEM II.F.1.3

In our revision 3 response to NUREG-0737, dated June 28, 1982, Vepco stated that the final in-situ calibration of the Containment High Range Radiation Monitors will be performed during the first scheduled outage after availability of a calibration system to Vepco.

The vendor of the Containment High Range Radiation Monitors (Victoreen) does not have a source available to perform the final in-situ calibration. Victoreen has expedited the development of a prototype calibration source to calibrate this system but it is not available to Vepco. Vepco has been notified by Victoreen that the source to perform the final in-situ calibration will be available to comply with a September 30, 1984 completion date.

The status of NUREG-0737, Item II.F.1.3 will be updated in revision 4 of NUREG-0737 which is scheduled for completion by March 31, 1983.

Very truly yours,

  
W. L. Stewart

cc: Mr. Steven A. Varga, Chief  
Operating Reactors Branch No. 1  
Division of Licensing
