Division of Licensing
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Serial No. 110A
NO/WDC:acm
Docket Nos. 50-280
50-281
License Nos. DPR-32
DPR-37

Gentlemen:

In our letter dated September 13, 1983 (Serial No. 521) and supplements, Vepco proposed a change to the Surry Technical Specifications pertaining to reduction in the minimum boron injection tank concentration, which the NRC issued on February 24, 1984. As part of the change, Specification 3.3.A.3 was deleted and Specifications 3.3.A.4-3.3.A.13 were renumbered to 3.3.A.3-3.3.A.12 accordingly. However, due to oversight, references to Specifications 3.3.A.9, 3.3.A.10 and 3.3.4.11 in Specifications 3.3.B.8 and 3.3.B.9 were not changed. The NRC is requested to reissue page TS 3.3.-5 with the following corrections: Specification 3.3.B.8 should reference Specification 3.3.A.8 and 3.3.A.9. Specification 3.3.B.9 should reference 3.3.A.10.

Very truly yours,

W. L. Stewart
