50-281
License Nos. DPR-32
DPR-37

Gentlemen:

VIRGINIA ELECTRIC AND POWER COMPANY
SURRY POWER STATION UNITS 1 & 2
REQUEST FOR ADDITIONAL INFORMATION
INSERVICE INSPECTION PROGRAM

Your letter of May 23, 1988 requested additional information on the second 10-year Inservice Inspection Program submitted on April 16, 1987 for Surry Units 1 and 2. You requested a response to your questions within 45 days or a schedule for response within 30 days. This letter identifies our schedule for responding to your request for information.

Surry Unit 1 has been and continues to be in an extended refueling outage and Unit 2 has been in an outage since May 16, 1988. Due to work in support of the outages, limited resources are presently available to respond to your request. Following a review of your questions, we have determined that we can provide a response to your request by September 30, 1988.

Subsequent to your review of our responses, we propose to submit a revision to our Inservice Inspection Program for Surry Units 1 and 2 so that our program submittals will be current.

If you have any questions or require further information, please advise.

Very truly yours,

D. S. Cruden
