Subject: RAI, Field Test Plot earlier samples

Discussion: I called Mr. Brisbin to see if we could get the sample results that were performed post any research done in the test plot fields. According to the historical site report, they took samples after performing a research project. If the samples reflected an activity that was greater than 2 times the normal background of carbon-14, then they would remove soil from the area as radioactive and take additional samples.

Mr. Brisbin said that he would work to get these results. They have been archived and would probably take a few weeks to obtain.

Action Required: Wait to get sample results.
