Division of Reactor Licensing  
Office of Nuclear Reactor Regulation  
Washington, DC 20555

Attention: Mr. John F. Stolz, Chief  
Light Water Reactors Branch No. 1

Gentlemen:

SUBJECT: GENERAL ELECTRIC REPORT, "MK II CONTAINMENT SUPPORTING  
PROGRAM REPORT," NEDO-21297, REV. 1, DATED MARCH, 1978

Seventy (70) unbound copies of the subject report are being provided by General Electric for the Mark II Owners Group for your information and comment.

This report describes the overall Mark II Containment Supporting Program, and includes summary information on all program activities. The content and status of each task through approximately mid-March, 1978, is provided, as well as the relationships among the tasks.

Because of the extensive changes made to this document, the original version, NEDO-21297, issued in May, 1976, is totally superseded by the enclosed Rev. 1.

The report has been prepared in a loose-leaf format; three-ring binders are being prepared and will be forwarded to you in mid-April. The notebook format was selected to facilitate simplified periodic update of the report to reflect progression of the program.
