Mr. Wm. H. Regan, Jr., Chief  
Environmental Projects Branch 4  
Division of Reactor Licensing  
Nuclear Regulatory Commission  
Washington, D. C. 20555

Dear Mr. Regan:

This is in response to your letter of 14 April 1975 addressed to Mr. Benjamin O. Davis concerning a draft environmental impact statement for the Palo Verde Nuclear Generating Station, Units 1, 2, and 3, Maricopa County, Arizona.

The concerned operating administrations and staff of the Department of Transportation have reviewed the material submitted. The Federal Aviation Administration had the following comments to offer:

"While the exposure and frequency will not be significant, there could be some increased hazard during aerial application of chemicals to agricultural crops that are located in the immediate vicinity of the transmission line corridors.

"Please be advised that the sponsor is required to file a notice with the FAA where determined applicable and as stipulated under Part 77 of the Federal Aviation Regulations."

The Department of Transportation has no other comments to offer nor do we have any objection to this project. The final environmental impact statement, however, should address the concern of the Federal Aviation Administration.

The opportunity to review this draft statement is appreciated.

Sincerely,

  
W. R. RIEDEL

Acting Deputy Chief, Office of Marine  
Environment and Systems  
By direction of the Commandant
